

Economical yet casing-friendly.

Low casing wear, ease of application, and very competitive pricing create a winning combination that continues to endure. Arnco's original non-cracking hardbanding alloy **100XT** has an excellent balance of features and price, bolstering its long, successful reputation.

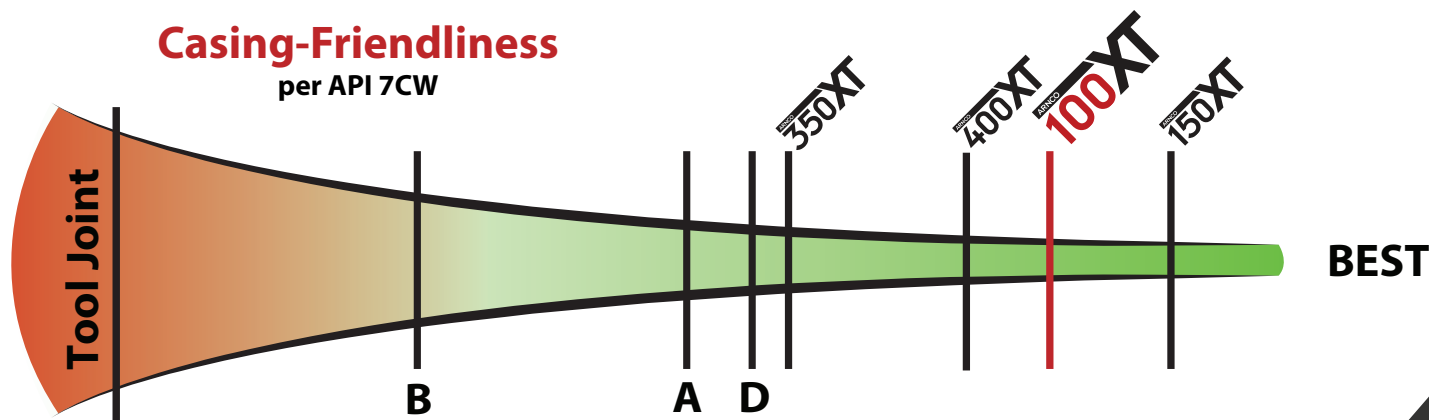

For open hole applications, **100XT** is one of the only hardbanding alloys in existence that can accommodate added tungsten carbide without cracking. This effective combination makes the hardbanding last substantially longer than any casing-friendly hardbanding.

COMPATIBILITY	➤ 100XT	➤ Duraband® NC	➤ TCS-8000
	➤ 350XT	➤ Tuffband® NC	➤ OTW-13CF
	➤ 400XT	➤ TCS-Titanium	➤ Guardian CF
REVERSE COMPATIBILITY	➤ 100XT	➤ Tuffband® NC	➤ BoTn5000
	➤ 150XT	➤ TCS-Titanium	➤ Guardian CF
	➤ 350XT	➤ TCS-8000	
	➤ Duraband® NC	➤ OTW-13CF	

Wear-Resistance (Durability) per ASTM G65

Casing-Friendliness per API 7CW
